Subject: BSM Wall Project.

Len,

I apologize I did not send this earlier.
I never was able to take the time to give you a proper thanks.

I was impressed by the way OCC was able to pull off the complexity of what that project entailed. It was only after you presented what OCC could do for us did we realize this was no simple task. We were grateful to have someone like yourself overseeing this project looking out for our interests. Your professionalism and the dedication were outstanding.

Knowing the timeline was extremely compressed, and the "unknowns" were many. Your designer/estimator/PM, Rob Tarrien was the MVP as this project went. His attention to detail, and willingness to make suggestions based on his experience was truly appreciated. Those units went together just as he presented them to us.

The guys that were here working the steel were also appreciated. They demonstrated great skill to their work and were also mindful of the expensive, delicate equip they had to work around.

Thank you for a job well done.

I did not know who else to send this to so if you could share with others I would appreciate it.
