Len

Please pass this on to Kyle, Bob and George as well because although I have had couple months I still haven't saved their respective email addresses.

I just want to say thanks to you guys for what is thus far, a job well done. The Arbec Buffer project has been one of the most 'transparent' startups as I have seen on the P221 line. I realize your guys were somewhat uneasy with some of the changes I was making in the 11th hour, but I felt they were needed for production to utilize the buffer. I wanted to see the changes incorporated and debugged before Bob and George left the building. I appreciate their patience.

We have left the unit in full auto load and unload modes for 6 shifts now with only very minor complications. The error recovery works very well.

Could you forward me electronic copies of all the manuals, as-builts, etc... I failed to get them from Bob before he left even though he asked me a couple times if I'd like to have them. I would like to have the electrical as-built drawings emailed as soon as you get a chance, the rest you can wait and send on CD's.

Thanks guys,

Troy Fackler
